

PIPE ALIGNMENT TROLLEY

NEW

PAT 2

SAFETY

Self loading so reduces manual handling of large fittings.
Very little training required.

ACCURACY

Six way levelling system which allows for fine adjustment.

EFFICIENCY

Single operator can set up with ease, reducing labour costs and time. PAT 2 can be used on its own frame, workshop gantry, swing beam or mobile crane for site work.

CONDELL
PIPE ALIGNMENT SPECIALISTS

Patent Pending

Do you want to save time in your business? PAT 2 can do that and more....

PAT 2 is a new mobile pipe alignment tool which can be used on its own frame or on any other form of lifting device in the workshop or on site.

PAT 2 (8/24) is ideal for aligning pipes and fittings 8 to 24 inches in diameter.

WARNING Do not apply braking system while lifting as PAT2 must move to be central over the load.

TROLLEY DETAILS

Model:	PAT 2 (8/24)
Height:	Adjustable 2750-2950mm / 108 - 116"
Weight:	206kg / 453 lbs
Length:	1220mm / 48"
Width:	1220mm / 48"
Lifting Capacity:	400kg / 880lbs
Lifting Mechanism:	Chain block Cordless or manual

FEATURES

- Heavy duty steel construction
- True vertical lift
- Six way levelling system
- Four wheel breaking system
- All wheel steer
- Chain block permits pin point control
- Rubber roller bearing wheels

MAINTENANCE

Visual inspection must be carried out daily before use, checking:

- Condition of wheels
- Braking system
- Condition of chain blocks
- Pins and clips are in good condition

Operators of this equipment must be trained before using.

Note that the design of the Pipe Alignment Trolley may be changed without prior notice.
