PAT

the Pipe Alignment Trolley

SAFETY ACCURACY EFFICIENCY

Accurate pre-assembly of high and low pressure piping systems along with very high productivity and safety rates are achieved in pipe fabrication when using PAT the Pipe Alignment Trolley.

PAT is a new patented mobile unit with a 6 way leveling system, forward thrust and built in breaking system which benefits pipe fitting, making it more streamlined and easy to do time and time again with safety, accuracy and efficiency.

Do you want to save time in your business? PAT can do that and more....

Ideal for use on pipes and fittings between 3 & 16 inches

Trolley Details

Model: **PAT 3/16**
Height: **1550mm**
Weight: **194kg**
Length: **1220mm**
Width: **1050mm**

Lifting Capacity: **150kg**
Lifting Mechanism: **Winch**
Lift Height: **1100mm**

Features

- Heavy duty steel construction
- True vertical lift
- Six way leveling system
- Single wheel braking system
- Rear wheel steer
- Winch permits pin-point control
- Rubber roller bearing wheels
- PAT offers the ability to handle pipes/ fittings less than 150kg
- 2 sets of tooling included

Maintenance

- Visual inspection must be carried out daily before use, checking:
- Condition of wheels
 - Braking system
 - Rope integrity on winch
 - Bearings on steering mechanism needs greasing

Operators of this machine must be trained before operating.
