Center Finder

PIPE FITTING CENTER FINDER

The Pipe Fitting Center Finder from Condell Engineering Solutions Ltd. is a true innovation that greatly increases the efficiency of preparing fittings for fabrication.

It is the first device of its type on the market. It allows fittings to be accurately pre-marked and therefore ready for assembly before being delivered to the fitting team – saving time and therefore allowing the job to be completed much quicker.

CONDELL
PIPE ALIGNMENT SPECIALISTS

Benefits

- **Increased accuracy** – when locating center spots
- **Increased efficiency** – center marking is easier and quicker to achieve
- **Increased productivity** – pipes can be marked by a semi-skilled operative, allowing fully skilled staff to remain at other tasks
- **Long-term savings** – the increased productivity means projects can be completed more quickly

Construction

The Pipe Fitting Center Finder consists of an easily adjustable fitting holder, along with a separate center marker fitting for flanges. All elements are constructed from stainless steel.

Using the Pipe Fitting Center Finder

Using the Pipe Fitting Center Finder is simple. It can be used for accurate and efficient marking of:

- Flanges
- Elbows
- Tee pieces
- Concentric reducers
- Eccentric reducers

The fitting holder is fully adjustable in all directions to accommodate pipes and fittings from 1.5 to 6 inches.

PIPE ALIGNMENT VICE

The Pipe Alignment Vice allows the clamping of pipes and fittings from 2 to 10 inches in diameter. It allows pipes and fittings to be clamped in the horizontal position and then rotated to the desired working angle.

CONDELL
PIPE ALIGNMENT SPECIALISTS

Benefits

- It can plumb and level the components
- Two-way levelling system
- Allows a single operator to tack up components in the horizontal position
- Can be used without additional pipe clamps or flange pins
- Can be fitted to any bench

Construction

The Pipe Alignment Vice consists of a half circle protractor face plate which has notches every $22\frac{1}{2}^{\circ}$ in which the pipe fabrication components can be locked in place using the drop over latch.

- All elements are constructed from carbon steel
- Safety handle
- Two-way levelling system

Safety Accuracy Efficiency

With all Condell Pipe Alignment Tools, safety accuracy and efficiency are of the utmost importance. When using the Vice, components are clamped SAFELY into the horizontal position and then rotated to the desired angle. Through the use of the two-way levelling system, pipes and fittings can be ACCURATELY plumbed and levelled. The Vice is EFFICIENT as it allows just a single operator to tack up components for pipe fabrication.

CONDELL

PIPE ALIGNMENT SPECIALISTS

Condell Engineering Solutions Ltd.

Condell Engineering Solutions Ltd. are developers, manufacturers and distributors of innovative pipe fitting tools for use in all industrial sectors.

Benefits of Condell Pipe Fitting Tools include:

- Ease of use
- Greater accuracy and efficiency
- Reduction in manual handling
- Increased operative safety
- Increased productivity

Several leading companies in the pipe fitting industry are already experiencing the benefits of Condell Engineering pipe fitting systems.

Operators must be trained before using.

Patent Pending.

Condell reserve the right to change the design of these tools without prior notice.
